

Association Portal

Browser Troubleshooting

1. Some technical issues with the portal may be caused by browsers or devices.

At this time the portal works best with either Google Chrome or Firefox browsers.

2. The portal will technically work if you choose to use alternate browsers, but you may experience significant difficulties.

3. The portal is not optimized for mobile devices at this time. This includes phones & tablets. Attempting to access the portal using any mobile device will severely limit the function.

4. At this time, we strongly recommend accessing the portal on either a desktop or laptop using only Chrome or Firefox browsers!
